

**I pledge to play my part to make Surrey a thriving place to live and work.  
A place that's healthier, greener and more affordable – for everyone, now and  
for future generations.**

**I pledge to champion decisions that benefit our local people and their communities, through  
collaborative thinking and allocation of funding and resources.**

**This work will support:**

### **Building Healthy and Sustainable Communities**

by ensuring comfortable, energy-efficient homes protected from flooding and extreme weather and encouraging local initiatives (Repair Cafes and Libraries of Things) that reduce waste, lower living costs and strengthen relationships in our communities.

### **Protecting and Enhancing Nature for Everyone**

by improving access to nature and the outdoors for all, protecting and restoring local green corridors and habitats, and campaigning for improved water quality to protect our health and wellbeing.

### **Cutting Energy Bills and Creating Green Jobs**

by championing initiatives to scale up home energy efficiency, renewables and promoting local take-up of job opportunities in retrofit, sustainable transport and renewable energy.

### **Making Transport Affordable, Accessible and Healthy**

by advancing integrated active and public transport options and developing plans that reduce air pollution, improve road safety (particularly for children), and prioritise walking, cycling and buses.

### **Empowering Communities**

by advocating for local people to participate in and have genuine influence over decisions about community, energy projects, green spaces, local planning and initiatives that affect their lives.
